

Gabriel Kurowski

Software Engineer | AI, Cloud & Automation

kurowski.id gabriel-kurowski gabriel@kurowski.id +48 604 334 047

Summary

Software engineer and technical lead building Flutter and Firebase apps on Google Cloud since August 2023. Ships production AI assistants, custom MCP tools and LLM evaluations, backed by GitHub Actions CI/CD and self-managed servers.

Professional Experience

Software Engineer & Technical Lead @DEVEJI
01.2025 – Present

- Designed and shipped a production travel AI assistant with text and voice chat (DeepSeek via OpenRouter, ElevenLabs) and database tools; added OpenAI moderation, usage limits and access controls
- Built an applicant tracking system with AI analysis of CVs against job descriptions, processing 400 applicants in 2 weeks using n8n and the OpenAI API
- Built and operated GCP services: functions, security rules, IAM, Secret Manager and Cloud Storage, with monitoring, backups and cost management
- Created GitHub Actions workflows for tests, builds, security checks and staging/production deployments
- Administered DEVEJI’s macOS server hosting n8n, Baserow, Portainer, nginx and WireGuard VPN, including a virtualized iOS build server used by GitHub Actions
- Combined architecture and daily coding with coordination of a 6-person development team across 3 client projects

Mobile Application Developer @DEVEJI
08.2023 – 12.2024

- Developed Flutter/Firebase apps for 2 US startups; built a financial dashboard for a Polish company
- Extended Python/JavaScript backends; began GCP engineering and DEVEJI server administration in August 2023

PowerShell Automation Engineer @DB Schenker
12.2022 – 07.2023

- Distributed software to 70,000+ users through Azure AD and Intune; automated helpdesk workflows with PowerShell and reusable knowledge-base documentation
- Automated MacBook deployment with Bash, reducing per-device setup from half a day to 30 minutes

IT Field Support Specialist @DB Schenker
01.2022 – 11.2022

- Migrated office access control to a virtualized environment with cloud VM backup and power failover, completing the overnight cutover without access disruption
- Upgraded a 400+ person office network, replacing 30+ switches and access points with no business-hours downtime

IT Specialist @Testronic
01.2021 – 12.2021

- Managed 100+ VLANs isolating confidential game builds; maintained Windows servers and Cisco switches
- Automated Active Directory maintenance with PowerShell, removing 200+ stale accounts

Earlier experience: Math and Programming Teacher, Zakodowani (2019 – 2020)

Projects

- Olivka:** built a calorie-tracking AI assistant entirely as a solo side project, with photo, voice and text input, automated evaluations of meal estimates and a manually curated golden dataset
- Genieprinter:** built an image-generation and print-on-demand product with an affiliate program
- Agent tooling:** built a local video-generation tool exposed through Model Context Protocol (MCP), a PR merge-conflict resolution skill and an automated code-analysis hook

Skills

Programming	Flutter	Dart	Python	JavaScript	PowerShell	Bash		
Cloud & DevOps	GCP	Firebase	Linux	macOS	Docker	Azure AD / Intune	GitHub Actions	CI/CD
	Terraform (self-study)							
AI & Automation	Claude Code	Claude Agent SDK	MCP	Agent skills & hooks	n8n	Make	Zapier	
Business	Software Architecture	Project Management	Team Leadership	Client Relations	Jira			
Languages	Polish (Native)	English (Fluent)
